Bodily & mental deformities

Murphy complained that he was sent into this breathing world scarce half made up & cheated of pleasure by dismally丑陋的 nature. The gross deformities of body are numerous and every anatomical museum contains scores of specimens of children with body without brain or with no brain in a sac at the back of the head, or with the two eyes joined or one, in the abdominal organs in a sac in front of the abdomen, with the two legs united ^{or with hands} in back the Scaries turns umbilically a band distending a great way off often detached and covered with life. On strange mistake! There has been a double ovum but in the development they have become joined up and the eye is included in the other or in part yet develops a leg & an arm growing out from the trunk or a heart attached to the chest. Goodness that these grave bodily deformities are rare - their forms are all incompatible with life, the number very little varying on webbed fingers can be remedied or are not serious.

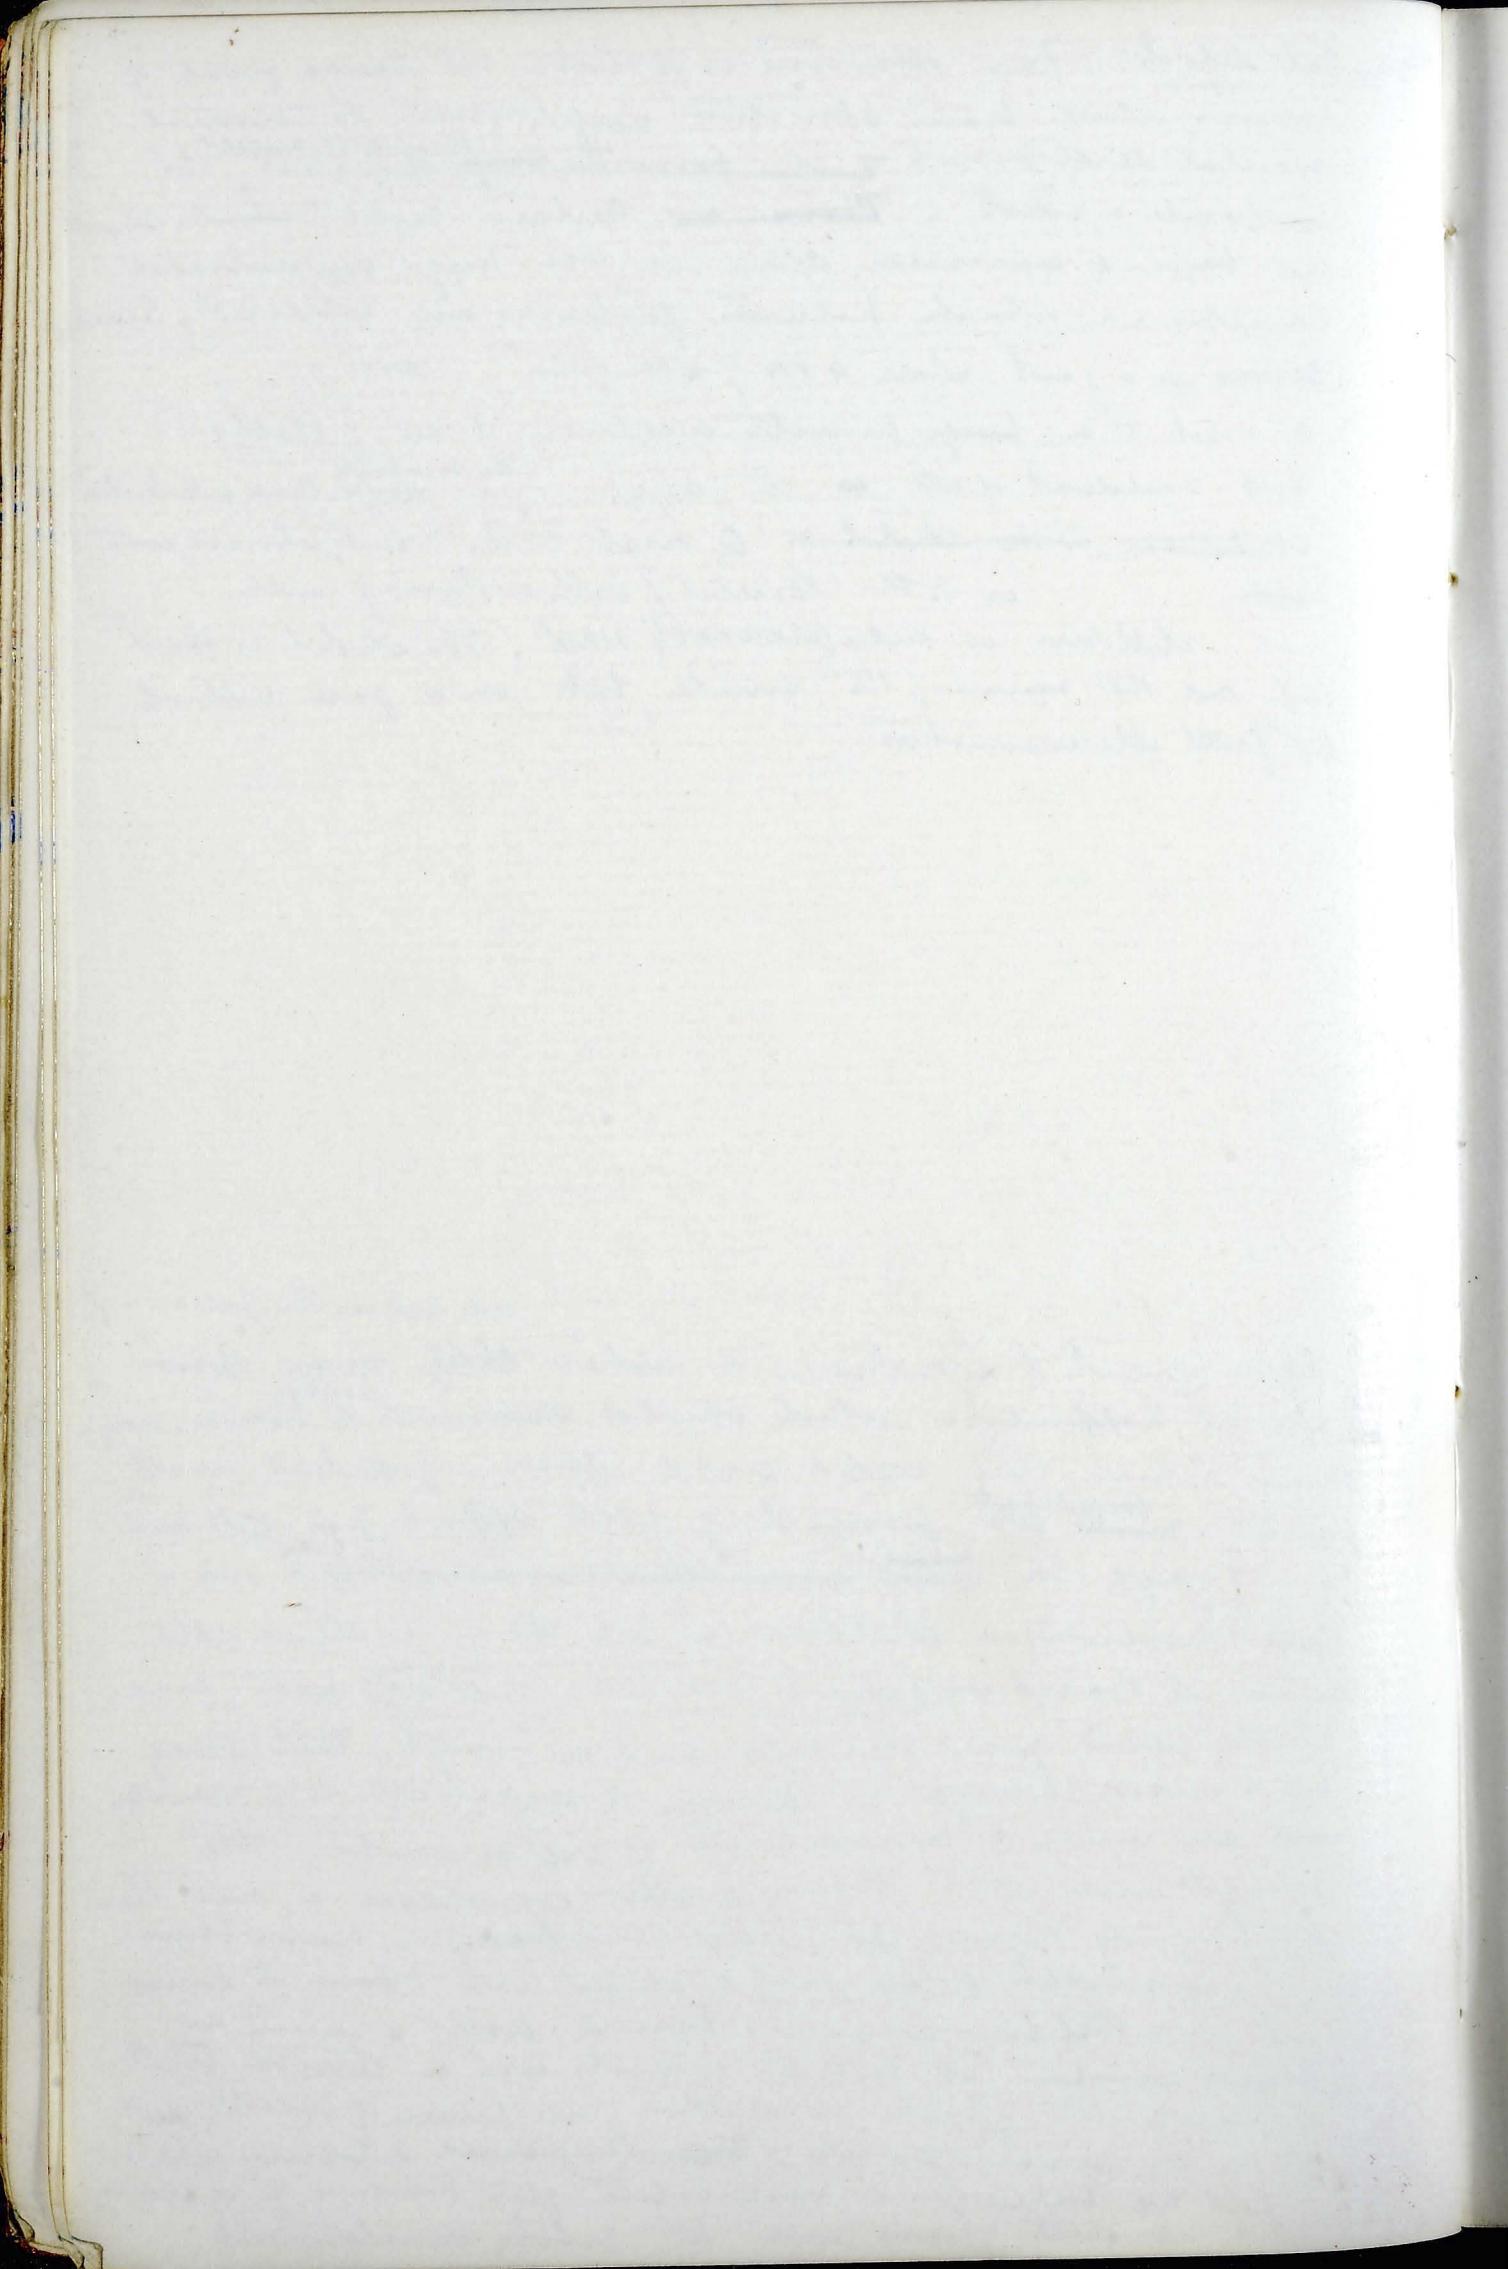

Mental defects. Far otherwise is it with the large group of persons whose brain structure ~~marks them~~ for normal mental development ~~such from the body defective~~ the unfortunate & idiot. There are certain sights ~~which~~ should us beyond expression when we see huge concentration camps in which Nature's failures are collected, Sunday serve in a jail when 4000 + 500 of the ~~are~~

a visit to a large lunatic asylum to see (8 belly)

but saddest still is the asylum for ~~depressive & deranged~~ ^{the mentally} children. The children A visit to the Salpêtrière, with its ⁱⁿ to the Brocatel (both in Paris) with children is very ~~presently~~ sad. The child is there but not the same, the smile, but in a face without the full illumination

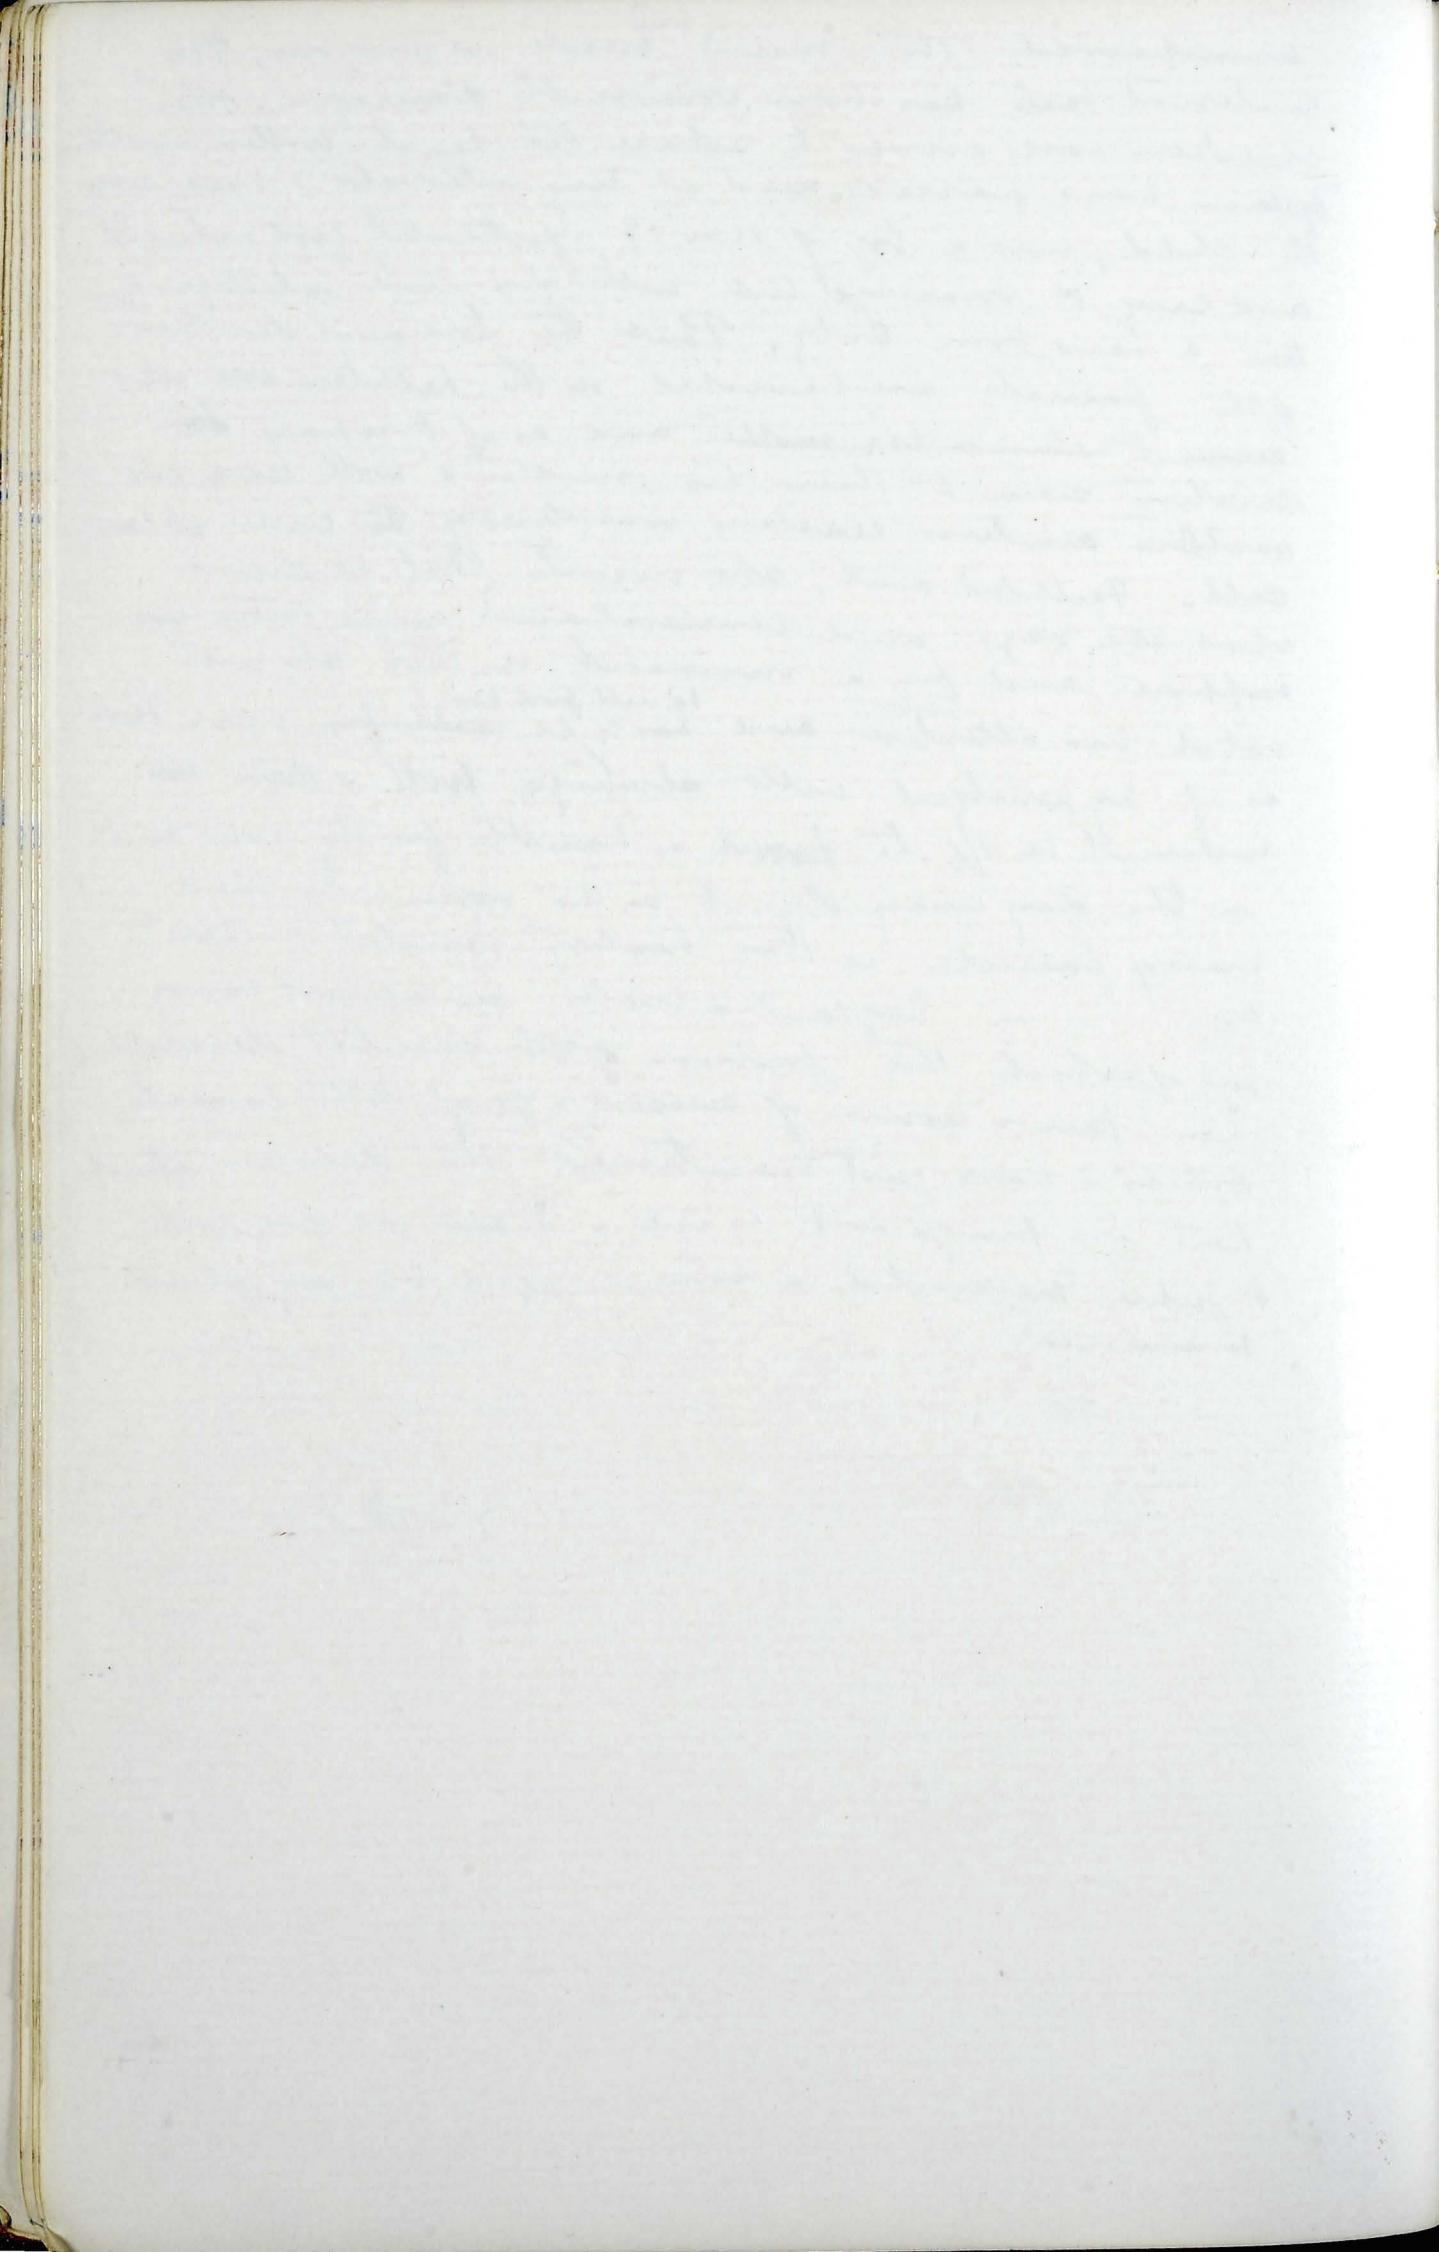

we are in the presence of

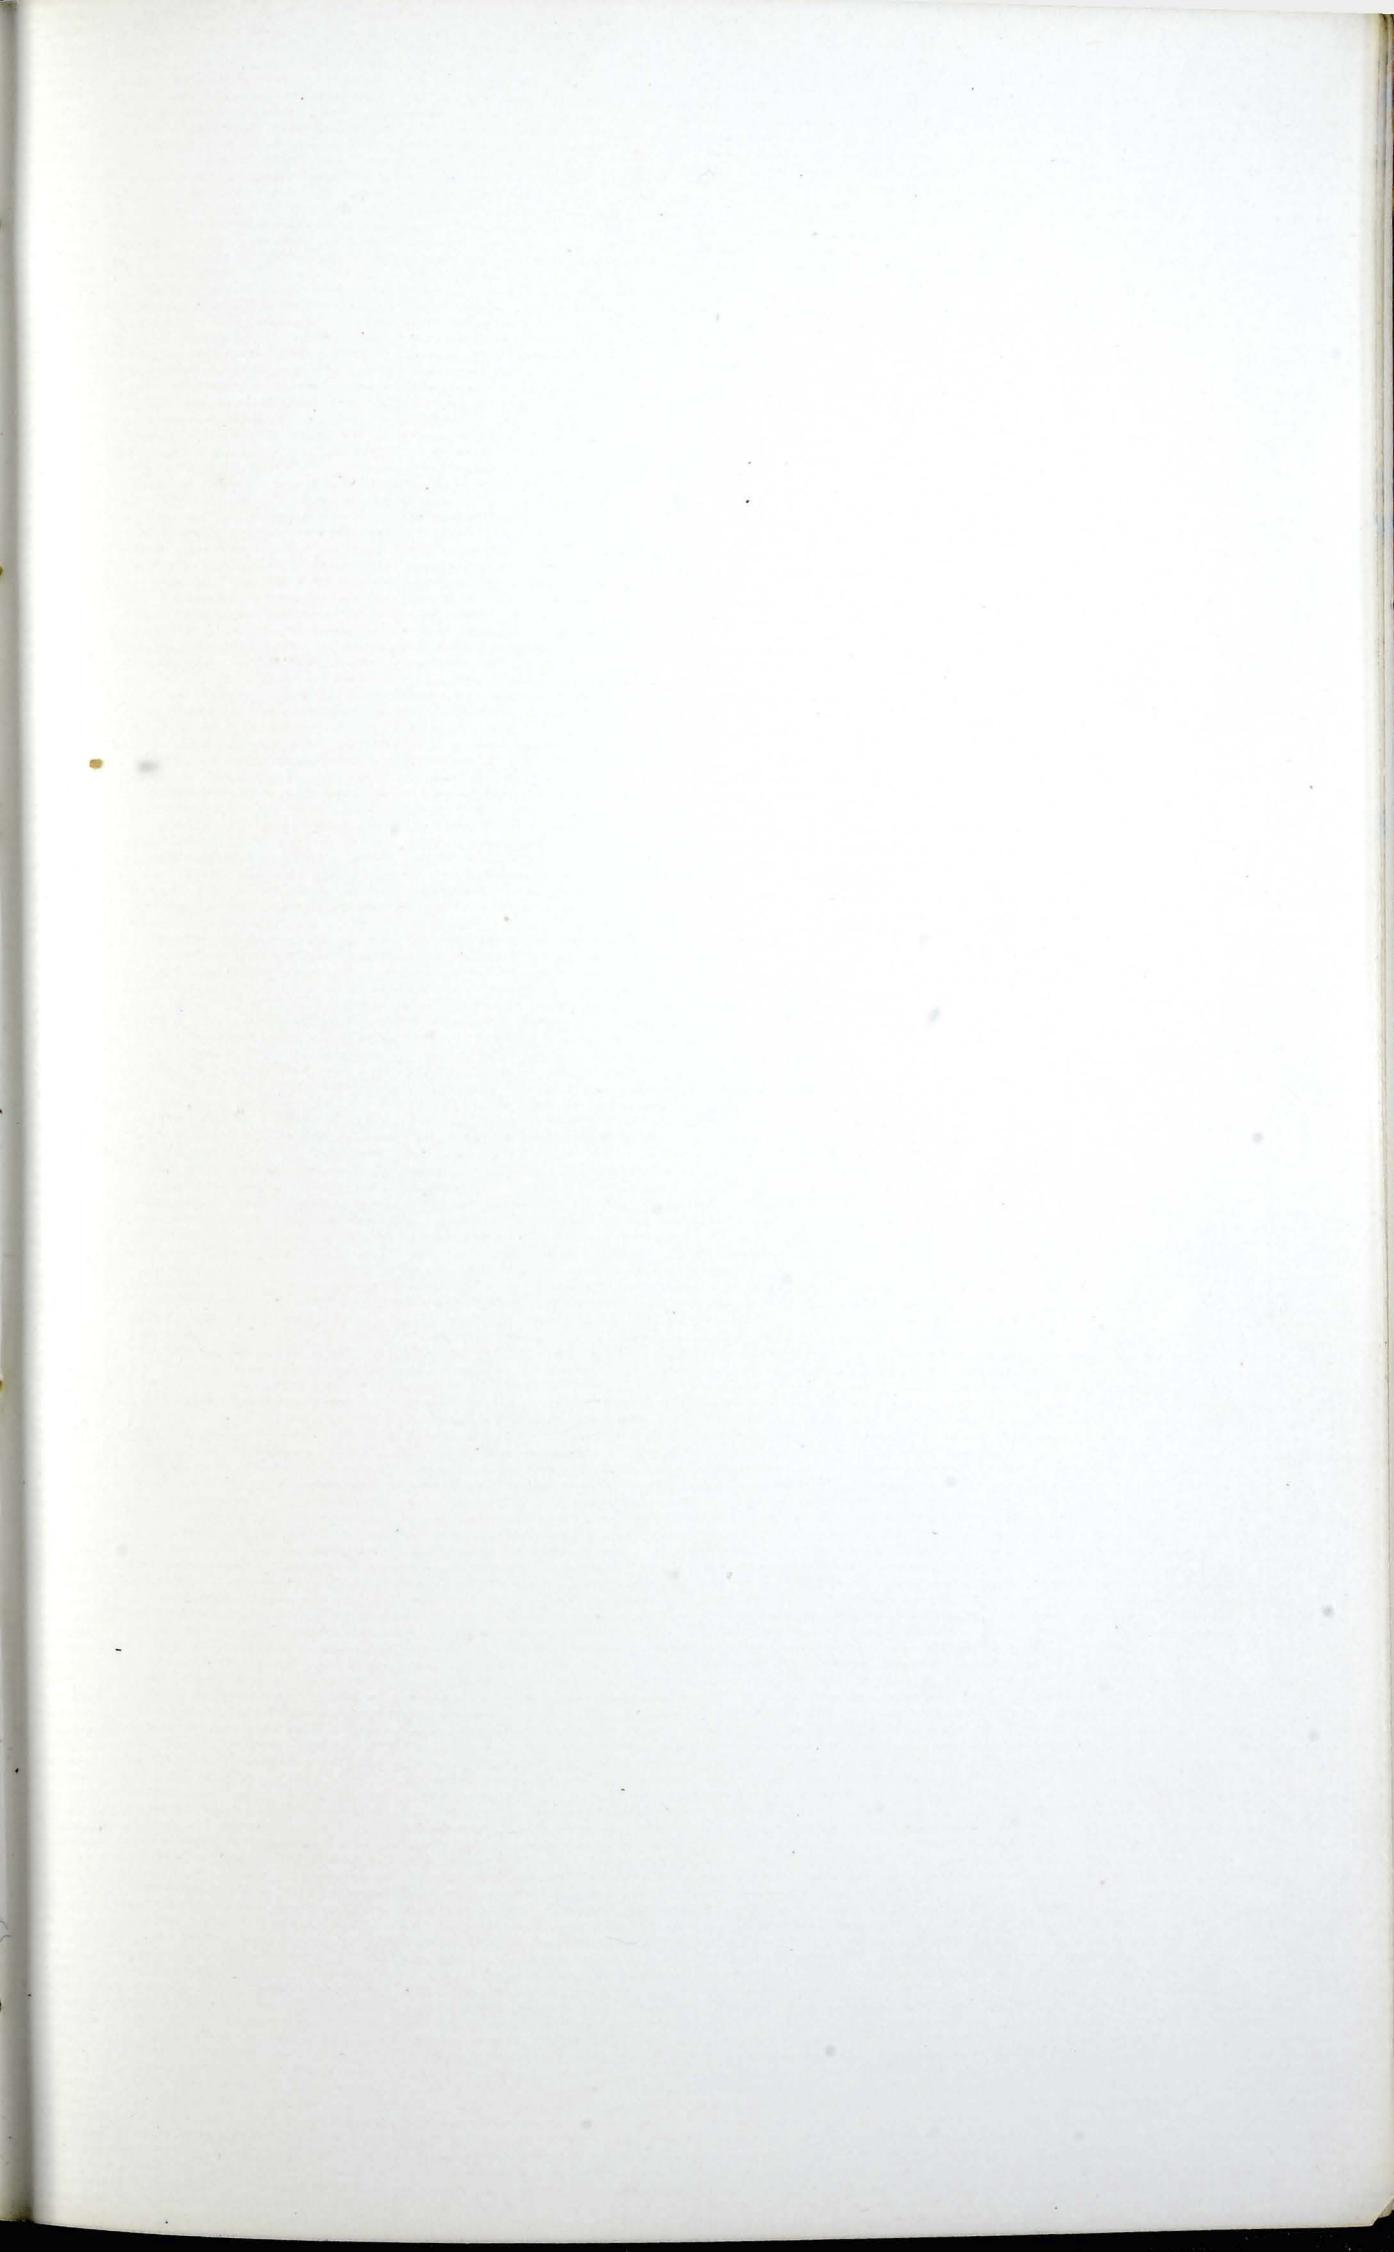

one of life's great tragedies, a brother ~~that~~ never known and all the happiness which should ^{bobby} surround a home. Every thing which this world could offer - positive health, family ~~and~~ ^{employed} the prospect of little offed for at two year's age he ~~was~~ more ^{more} ill than ~~never~~ left me of these Rubenesque children & little the picture of the infant Bacchus (and to see him naked) with his curly head great blue eyes and a laugh that rang as music through the house. A severe attack of measles and an unusual complication of inflammation of the membranes of the brain, a slow convalescence, and then the tragedy began. It would have been a hard blow to any mother to lose such a child but to have it come not from that long anxious period with a mind as blank as when it left the womb was a terrible trial no recognition of father or mother, no power of speech, not even the power to smile. At length the passed & hoping against hope we looked for a reeducation of the brain & a recovery but at three years with the bodily development

unimpaired the mind had made no progress. The maternal bias has been irreversibly damaged. Other children have come to succor the heart-broken mother. Years have passed and at long intervals I have seen the child, now a boy of 16 or 17, fortunately good natured and eager to manage but with no more intelligence than a new-born baby. But the love and devotion of the family are lavished on the helpless one who seems to know his mother and as if to repay her devotion seem to know his mother & will cease his restless aimless wanderings to come at her call. Faithful soul! she insists that he knows what she says and understands more than we suppose. and for a moment or two she will catch his attention and her eyes will fix upon him as if by magnetized with strange, look & then her mind will be off to search a handle for the wool hand in the day every object in the room. In how many families is this history repeated? There are in England & Wales in almost every one of which the failure of the mental development has been a source of misery & grief to the parents. But as I have just mentioned the devotions which these bring out is one. I saw one day with Dr John Frederick a woman aged 83 very ill with pneumonia.

Chapter

The advantages of Ill-health - The Bridle of Thugs

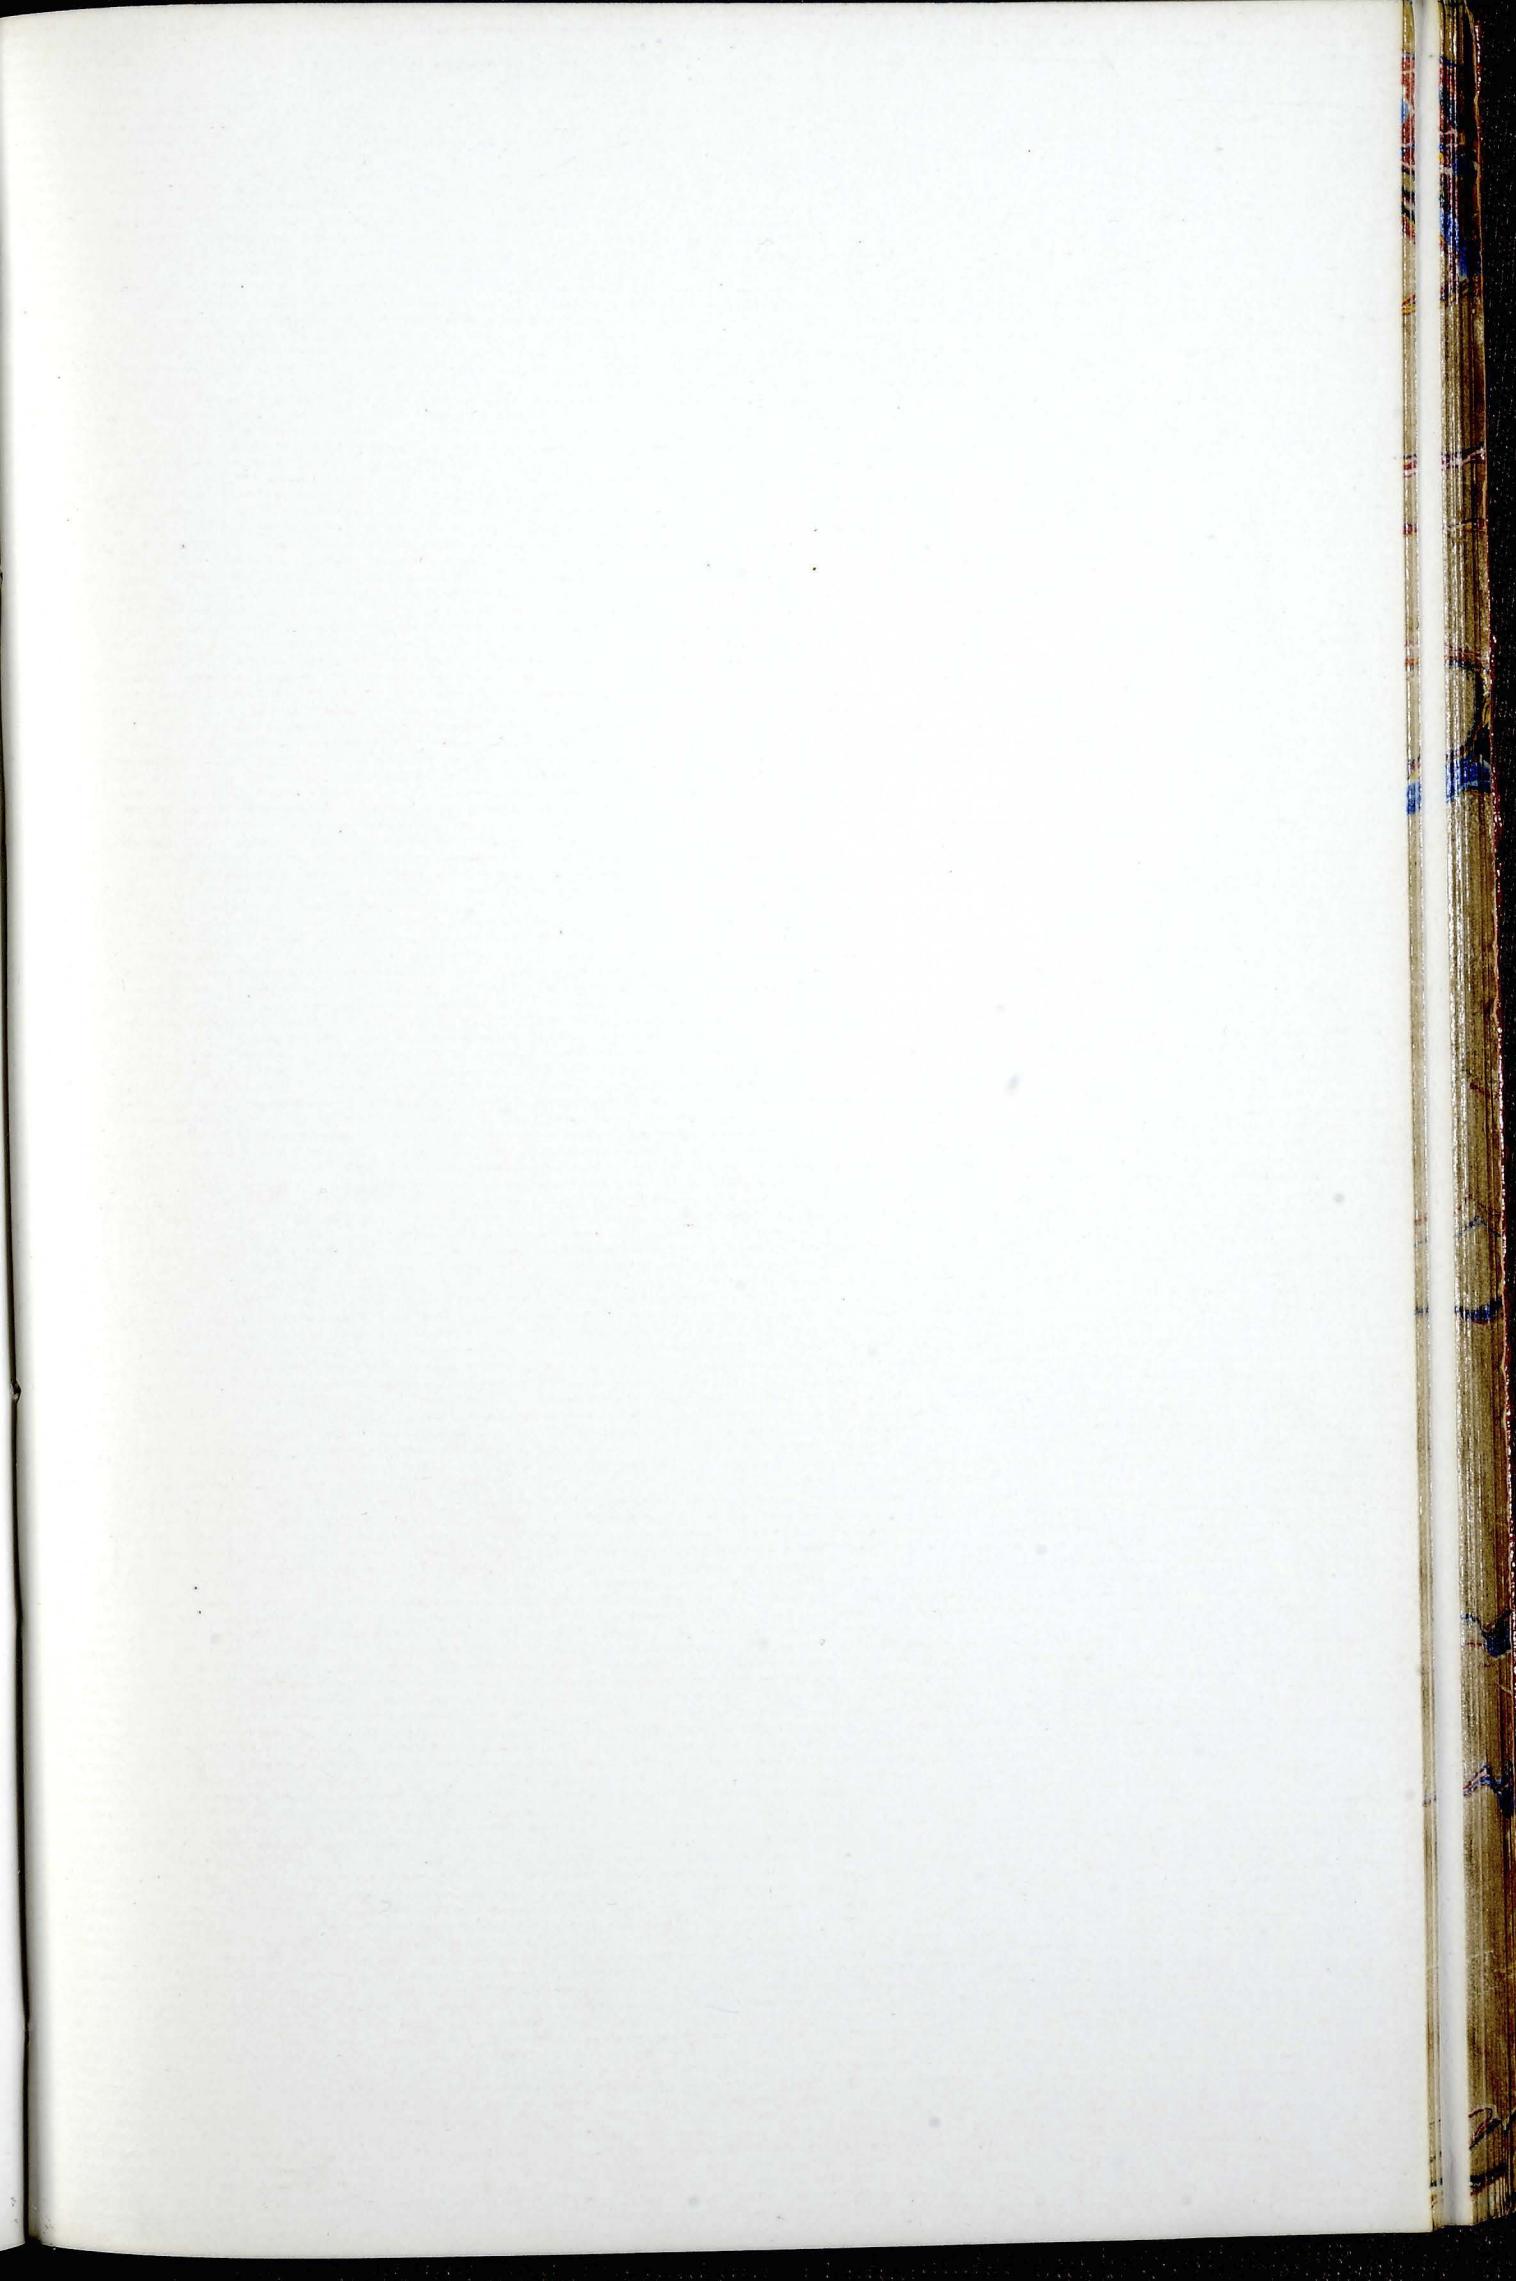

In the of Plato Socrates says of Theagles

Ill health may be either a bridle or a spur. Those who have never known the madness of superfluous health as Gibbon calls it who have been kept out of the arena & have been disqualified from 'Orestes' for bodily desultories have often ample compensation. Theager was doubtless a delicate lad, perhaps with a cough, or he may have had a form of spasmodic neuroasthenia. It was not much but enough to keep him out of the Gymnasium and from the ring and humble sports of the lads of his age. His father took special care with his education and no boy of his age knew the poet more thoroughly. He fell early under the influence of Socrates who saw the fine type of his character, and commended the bridle that would restrain him from public life. Poor fellow! we may suppose that as so often happens as he grew older he grew stronger as in the there is an allusion to him which shows that he had felt strong enough to go to the wars. In youth bad health may mean life-ruin. The neuroasthenic boy of 12 or 13 the only son the pride of his mother the despair of his father - pampered, spoilt, after a hurried pilgrimage of a week or two at each of the five or six large private schools of New England, without discipline, a bodily mental & too often a moral wreck at 16 or 17 - what picture more distressing. And yet how often have I seen it - as the mother & son have come into my consulting room & I have joined them at the top of the history card before I had asked a question "There only son of his mother separated from the mother, a wholesome abode life, proper companion, a good tutor saves a few but I meet meet them lads of ten or 15 years ago stranded in London, or in Paris or flitting from the Riviera to Egypt, lost souls not strong enough to go the devil like men but just strong violently enough to play the butterfly. The salvation of these lads is easy often can be put in good surroundings for a long enough period. The summer camps have been most helpful, and such a school as that founded by my friend whose untimely death so many deplore the summer in the Adirondacks & the winter in Florida puts vitality & self confidence into these boys, and I have known several others saved. The sad cases in life are the cripples, the lame, the deformed, the dwarfs, the hunchbacks. Some of the bitterest impressions to which I have listened have been of the boyhood of these maimed & halt. Liebenswürdigster Herr Jesu Christe, der Du für uns ein Kindlein geworden bist, und um uns von den Finsternissen der Sünde zu befreien, um uns an Dich zu ziehen und mit deiner heiligen Liebe zu entzünden, in einem Stalle für uns wolltest geboren werden: wir beten Dich an als unsern Schöpfer und Erlöser, wir anerkennen und erwählen Dich als unsern König und Herrn und als Tribut opfern wir Dir auf alle Affekte unseres armen Herzens. Lieber Jesus, unser Herr und Gott, würdige Dich, diese Gabe anzunehmen, und damit sie Dir wohlgefällig sei, vergib uns unsere Schulden, erleuchte und entflamme uns mit jenem heiligen Feuer, das Du gekommen bist in die Welt zu bringen, um damit unsere Herzen zu entzünden. Möge auf diese Weise unsere Seele ein beständiges Opfer zu deiner Ehre werden; mache, dass dieselbe hier auf Erden stets deine grössere Ehre suche, damit sie einst deiner ewigen Schönheit im Himmel sich erfreue. Amen.

100 Tage Ablass einmal im Tage, auch den armen Seelen zuwendbar. (Leo XIII, 18. Jan. 1894).

Die Statue des hl. Jesukindes wurde im 15.
